

Hayden Remington

DevOps Engineer

Denver, CO | haydenr337@gmail.com | 713-540-8989

Professional Summary

Results-driven DevOps Engineer with nearly 7 years of experience automating CI/CD pipelines, managing scalable cloud infrastructure, and implementing Infrastructure as Code (IaC). Recently specialized in AI-driven DevOps tooling, architecting Model Context Protocol (MCP) servers and meshes, custom Claude plugins, and intelligent automation that unify observability, deployment, and security platforms. Skilled in Azure DevOps, ArgoCD, New Relic, Terraform, Databricks, and Python, with a proven record of reducing deployment time, improving reliability, and optimizing cloud costs.

Technical Skills

Cloud Platforms: AWS, Azure, Google Cloud

CI/CD & DevOps Tools: Azure DevOps (ADO), ArgoCD, Jenkins, Docker, Kubernetes, Scalr

Infrastructure as Code: Terraform, Scalr, Ansible, ARM/Bicep

AI & Automation: Model Context Protocol (MCP), Claude plugins & agents, Power Automate, prompt/skill engineering, AI model enablement

Observability & Security: New Relic, Snyk, anomaly detection, monitoring & alerting

Data Engineering: Databricks, Change Data Capture (CDC) ingestion pipelines

Programming & Scripting: Python, PowerShell, Bash, C

Databases: SQL Server, MySQL, PostgreSQL (query optimization, patching)

Version Control: Git, GitHub, Azure Repos

Methodologies: Agile, Scrum

Professional Experience

Accuris - DevOps Engineer

Dec 2025 – Jun 2026 | Denver, CO

- Architected an MCP (Model Context Protocol) mesh that unified disparate MCP servers, including New Relic, ArgoCD, Snyk, Azure DevOps (ADO), and Scalr, into a single coherent interface, streamlining daily engineering work across observability, deployment, security scanning, and infrastructure management.
- Built a custom New Relic MCP server that outperformed the existing solution, improving query-generation accuracy, reducing token consumption, and lowering response latency.
- Developed a tailored Claude plugin with purpose-built tools and skills to scaffold new repositories, provision ArgoCD environments, and automate repetitive engineering tasks, accelerating onboarding and reducing manual setup.
- Automated Azure DevOps story creation by combining the ADO MCP with custom skills, delivering a streamlined, consistent workflow for backlog and sprint planning.
- Created a New Relic anomaly-detection monitoring tool using Power Automate that automatically surfaced anomalies and pushed real-time alerts to Microsoft Teams via webhooks.
- Spearheaded key platform migrations, including the New Relic Pipeline Cloud Rule migration, modernizing observability configuration with minimal disruption.
- Engineered Databricks Change Data Capture (CDC) ingestion pipelines to feed clean, real-time data into newly developed AI models.

TransCore - DevOps Engineer

Jul 2024 – Oct 2025 | Denver, CO

- Designed and implemented automated CI/CD pipelines using Azure DevOps, reducing deployment time by 30%.
- Built and maintained containerized environments with Docker and Kubernetes for scalable microservices deployment.
- Automated infrastructure provisioning using Ansible and Bicep, ensuring consistent environment configuration.
- Implemented nightly automated testing pipelines, improving bug detection and cutting post-deployment issues.
- Reduced cloud costs by 25% through resource optimization and improved monitoring tools.

TransCore - Software Engineer / Backend Developer

May 2023 – Jul 2024 | Nashville, TN

- Created dynamic SQL monitoring tools with automated alerting, improving issue response times.
- Developed reusable and idempotent automation scripts for continuous deployment and environment consistency.
- Managed AWS infrastructure to support high-volume production environments.
- Built QA environments with Infrastructure as Code, accelerating testing cycles.

TransCore - Systems Specialist

Aug 2022 – May 2023 | Houston, TX

- Automated patching for containerized systems, improving uptime and security compliance.
- Developed scripts for environment health checks and deployment validation, and enhanced configuration management workflows to cut update downtime.

TransCore - Systems Specialist / Missing Images Team Lead

Aug 2021 – Aug 2022 | Houston, TX

- Led a team to identify and remediate tolling data gaps, recovering lost revenue through improved system accuracy.
- Created stored procedures for transaction validation and data quality assurance, and trained staff on troubleshooting best practices.

Education

Bachelor of Science in Computer Science
Troy University
